Active Ingredient:

Lanolin

Lanolin falls into the lipid-rich emollient class of moisturizers. One of the causes of dry skin is a lack of lipids, which allows water to escape. Lanolin fills in those gaps, preventing future water escape. Skin bio-engineering studies have shown that the durational skin smoothing effect produced by lanolin is immediate, very significant and lasts for many hours. Lanolin is very effective in soothing dry, irritated skin anywhere on your body including the scalp.
